

Send this sheet with every Eternal Life Hospice print order. The supplied artwork is already built in CMYK to the values below — **print to these numbers; do not auto-convert or color-correct**. Deep plum and gold are the two colors most likely to shift on an RGB→CMYK auto-conversion (plum goes muddy/blue, gold goes flat). The Pantone column is the closest visual reference only — confirm against a Pantone Color Bridge book.

Deep Plum

CMYK	69 · 90 · 45 · 53
HEX	#3C1C3B
PANTONE (C)	5185 C (or 519 C)

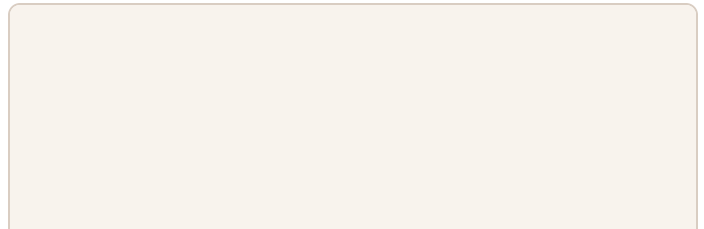

Plum

CMYK	65 · 90 · 37 · 28
HEX	#5B2E59
PANTONE (C)	518 C

Gold

CMYK	22 · 28 · 57 · 0
HEX	#C9B07E
PANTONE (C)	4525 C · metallic alt 871 C

Cream

CMYK	2 · 4 · 6 · 0
HEX	#F5F0EB
PANTONE (C)	9043 C · natural matte stock

Press notes

- ♦ Build the deepest panels and logo plates as **rich black** (not 100K alone) so dark plum reads deep and even.
- ♦ If the deep plum proofs muddy or brown, pull **Yellow down ~8–12 points** — it carries the most muddiness risk in a deep purple.
- ♦ If the gold proofs flat or greenish, **hold Yellow at 57 and add up to 4K** for depth; never let the press add Cyan (it turns gold olive).
- ♦ Cream is essentially the paper. On bright-white stock it prints as the light C2/M4/Y6 tint; on a natural/cream matte stock you may drop the tint and let the stock carry the warmth.
