

## # Eternal Life Hospice — Search Console SEO Validation

**\*\*Analysis-only deliverable | Source export:\*\*** `attached\_assets/https\_\_\_eternallifehospice.com\_-Performance-on-Search-2026-09\_1789970656180.xlsx`

**\*\*Work order:\*\*** `attached\_assets/Pasted-ETERNAL-LIFE-HOSPICE-SEARCH-CONSOLE-SEO-VALIDATION-CONT\_1789971421310.txt`

**\*\*Audit scope:\*\*** `website/elh-preview` and `website/content/30-day-journal`

**\*\*Status:\*\*** Recommendations only. No website copy, content source, technical SEO file, production configuration, or canvas component was changed.

## ## Executive summary

The Search Console export shows 141 clicks and 5,548 impressions for Web search over the “Last 3 months” filter, with daily chart rows from July 13 through September 19, 2026. Search visibility is strongest for the homepage and branded searches. The clearest demonstrated non-branded opportunities are Thousand Oaks local intent and Medicare/benefit information, while the Ventura/Los Angeles County hub, Calabasas, and Simi Valley pages need intent and snippet review.

The 30 staged Journal records are already represented by matching published blog HTML files. This is therefore primarily a portfolio, intent-ownership, and cannibalization problem—not a reason to publish 30 more URLs. The largest consolidation risk is the evaluation/referral group: articles 1, 12, and 30 should ultimately support one canonical evaluation/referral journey. Local articles should support location pages rather than compete with them.

**\*\*Current local article finding:\*\*** 5 dedicated Ventura-area articles and 0 dedicated Los Angeles County articles. The five Ventura-area subjects are Thousand Oaks, Simi Valley, Camarillo, Conejo Valley, and Moorpark. Three general articles mention Los Angeles County, but none is a dedicated LA County article.

## ## 1. Search Console findings

## ### CONFIRMED BY SEARCH CONSOLE

| Measure | Confirmed result |

|---|---|

| Filter/date | Web search; “Last 3 months”; chart rows 2026-07-13–2026-09-19 (69 daily rows) |

| Chart totals | 141 clicks; 5,548 impressions; 2.54% CTR (141 ÷ 5,548) |

| Query dimension | 343 query rows |

| Page dimension | 167 page rows |

| Mobile | 87 clicks; 1,518 impressions; 5.73% CTR; average position 21.54 |

| Desktop | 54 clicks; 4,017 impressions; 1.34% CTR; average position 34.70 |

| Tablet | 0 clicks; 13 impressions; 0% CTR; average position 16.77 |

| United States | 132 clicks; 4,760 impressions; 2.77% CTR; average position 31.62 |

| Search appearance | Translated results only: 0 clicks, 2 impressions, position 4.5 |

The country sheet totals 141 clicks and 5,421 impressions; the 127-impression difference from the chart is a reporting/dimension aggregation discrepancy and is not reconciled by inference.

**\*\*Critical workbook limitation:\*\*** Queries and Pages are separate dimensions. The workbook does **\*\*not\*\*** establish which query produced which URL. Query-to-page relationships below are therefore **\*\*PROPOSED SEO MAPPINGS\*\***, based on semantic fit and existing page subject matter, never confirmed query-to-URL attribution.

## ### Confirmed page observations

| Page | Clicks | Impressions | CTR | Avg position | Interpretation |

|---|---|---|---|---|

| `/` | 100 | 1,905 | 5.25% | 12.50 | Protect; strongest demonstrated asset |

| `/hospice-long-beach-ca` | 6 | 29 | 20.69% | 2.10 | Protect; small sample |

| `/careers` | 5 | 144 | 3.47% | 7.44 | Protect career intent |

| `/hospice-westlake-village-ca` | 5 | 127 | 3.94% | 6.98 | Protect; improve only with evidence |

| `/resources` | 3 | 293 | 1.02% | 4.08 | Review snippet and resource routing |

| `/about/aleksandra-dubina` | 3 | 109 | 2.75% | 3.55 | Protect founder/branded intent |

| `/hospice-ventura-and-los-angeles-county-ca` | 2 | 549 | 0.36% | 15.62 | P1 relevance/snippet/internal-link review |

| `/hospice-thousand-oaks-ca` | 2 | 487 | 0.41% | 11.35 | P1 local-commercial review |

| `/hospice-care` | 1 | 148 | 0.68% | 6.30 | Protect and clarify broad service intent |

| `/hospice-lancaster-ca` | 1 | 59 | 1.69% | 31.39 | Do not extrapolate |

| `/hospice-newhall-ca` | 1 | 22 | 4.55% | 9.59 | Protect; small sample |

| `/hospice-calabasas-ca` | 0 | 310 | 0% | 19.46 | P2 local review |

```
| `/hospice-simi-valley-ca` | 0 | 100 | 0% | 30.22 | P2 local review |
| `/resources/medicare-hospice-benefit` | 0 | 895 | 0% | 84.62 | P1 factual/content review |
| `/resources/first-48-hours` | 0 | 36 | 0% | 10.36 | P2 snippet and journey-stage review |
| `/blog` | 0 | 154 | 0% | 7.39 | P2 hub snippet/internal-link review |
```

### ### Confirmed query signals

The strongest individual rows include `eternal life hospice` (46 clicks, 384 impressions, 11.98% CTR, position 1.33), `eternal hospice` (3, 15, 20%, 2.07), `eternal life hospice westlake village reviews` (1, 80, 1.25%, 2.24), `hospice care in thousand oaks` (1, 15, 6.67%, 15.53), `medicare hospice` (0, 140, 0%, 82.31), `hospice agency thousand oaks` (0, 135, 0%, 9.10), `medicare hospice benefit` (0, 121, 0%, 75.62), `hospice nurse thousand oaks` (0, 113, 0%, 8.08), `hospice services thousand oaks` (0, 107, 0%, 4.89), and `home hospice thousand oaks` (0, 82, 0%, 8.15).

### ## 2. Query clusters

These are **PROPOSED** semantic clusters\*. They overlap and must not be summed as a partition.

```
| Cluster | Query rows | Clicks | Impressions | CTR | Weighted position | Recommended owner |
|---|---|---|---|---|---|---|
| Branded: Eternal/Aleksandra | 14 | 50 | 521 | 9.60% | 2.84 | Homepage, founder, reviews |
| Thousand Oaks local-commercial | 15 | 1 | 632 | 0.16% | 11.00 | One Thousand Oaks page |
| Medicare/benefit/coverage | 78 | 0 | 769 | 0% | 84.81 | Medicare resource |
| Other local hospice/near me | 33 | 3 | 231 | 1.30% | 31.16 | Relevant existing location pages |
| Clinical/condition | 5 | 0 | 10 | 0% | 44.70 | Disease/service resources |
| Professional/referral | 3 | 1 | 115 | 0.87% | 8.31 | Refer/referral pathway |
| Adjacent/irrelevant | 13 | 0 | 88 | 0% | 35.51 | Do not target as a new service |
```

Do not create separate pages for variants such as “hospice agency Thousand Oaks,” “hospice services Thousand Oaks,” “home hospice Thousand Oaks,” and “hospice nurse Thousand Oaks.” They should support one strong local page with natural language variation.

### ## 3. Existing URL inventory

#### ### Site inventory and template facts

The deployable preview contains 229 HTML files: 147 root `hospice-\*.html` area pages (146 community pages plus one Ventura/Los Angeles County hub), 37 blog HTML files (hub/index plus 36 posts), 9 resource pages, one service detail, and core pages including home, services, resources, family guide, refer, and referral card.

Across the inventory, 213/229 files contain absolute canonicals and 211/229 contain JSON-LD. Exactly six files contain `noindex`: `blog/index.html`, two card pages, 404, privacy policy, and terms. Most production pages have one H1 and multiple H2s. The area-page template uses WebPage, Service, BreadcrumbList, and FAQPage graphs; resource/service pages use WebPage/Organization or article-style markup; the blog hub uses Blog/BlogPosting collection markup. Verify visible FAQ content before relying on FAQ rich-result eligibility.

#### ### Priority URL inventory

For priority pages, title/H1 patterns are summarized from the deployed templates; exact current metadata must be preserved until an approved implementation pass.

```
| URL | Type | Current title/H1 pattern | Primary topic / apparent intent | Index/canonical/schema | Links in/out (architecture summary) |
|---|---|---|---|---|---|
| `/` | Home | Branded hospice/location title; home H1 | Brand + broad hospice discovery | Indexable; absolute self-canonical; Organization/WebPage/FAQ graph | Global navigation to services, resources, locations, family, referral |
| `/hospice-ventura-and-los-angeles-county-ca` | County/region hub | Hospice Ventura and Los Angeles County; regional H1 | Coverage discovery and local commercial intent | Indexable; self-canonical; Service/Breadcrumb/FAQ | Parent discovery node to city pages; conversion/referral CTAs |
| `/hospice-thousand-oaks-ca` | City | Hospice Thousand Oaks; local H1 | Local hospice/service/home-care intent | Indexable; self-canonical; Service/Breadcrumb/FAQ | County/footer links; should receive contextual blog links |
| `/hospice-westlake-village-ca` | City | Hospice Westlake Village; local H1 | Local service + branded review intent | Indexable; self-canonical; area schema | Protect; contextual local links only |
| `/hospice-calabasas-ca` | City | Hospice Calabasas; local H1 | Local hospice discovery | Indexable; self-canonical; area schema | County/footer; needs useful local context |
| `/hospice-simi-valley-ca` | City | Hospice Simi Valley; local H1 | Local hospice discovery | Indexable; self-canonical; area schema | County/footer; needs relevance review |
| `/hospice-care` | Service | Hospice care/service title and H1 | Broad commercial service intent | Indexable; self-canonical;
```

WebPage/Organization | Link to evaluation, local hub, referral |  
 | `/services` | Service hub | Hospice services title/H1 | Service taxonomy | Indexable; self-canonical; WebPage/Organization | Service detail, care pathway, referral |  
 | `/resources` | Resource hub | Hospice resources title/H1 | Family education discovery | Indexable; self-canonical; resource links | Links to evergreen guides and blog |  
 | `/resources/medicare-hospice-benefit` | Resource | Medicare Hospice Benefit title/H1 | Coverage/benefit research | Indexable; self-canonical; WebPage/article-style | Should link to service, family guide, referral |  
 | `/resources/first-48-hours` | Resource | First 48 Hours title/H1 | Post-admission expectations | Indexable; self-canonical; resource schema | Should link to services and after-hours support |  
 | `/family-guide` | Family hub | Family Guide title/H1 | Family education and next steps | Indexable; sitemap; self-canonical | Resource/blog hub to care/referral path |  
 | `/refer` | Professional/referral | Referral title/H1 | Provider/facility referral | Indexable; self-canonical; referral CTA | Forms and referral-card links |  
 | `/referral-card` | Referral asset | Referral card title/H1 | Professional conversion asset | Indexable in current audit; verify whether campaign asset should be noindex | Footer/referral links; protect form behavior |  
 | `/blog` | Blog hub | Blog/Journal title/H1 | Educational content discovery | Indexable; self-canonical; Blog/BlogPosting | Links to articles; articles should link to core owners |  
 | `/careers` | Professional/employment | Careers title/H1 | Employment intent | Indexable; self-canonical | Protect; separate from hospice acquisition |  
 | `/about/aleksandra-dubina` | Founder/about | Founder title/H1 | Branded/provider trust | Indexable; self-canonical; person/org context | Protect branded pathways |

### ### Repetitive location inventory

The 146 city/community pages share a templated structure: local title/H1, service and family/professional sections, FAQ, BreadcrumbList/Service/FAQ schema, county/footer discovery, and conversion CTAs. This is useful architecture at scale but creates near-duplicate and thin-locality risk. Audit each page for truthful coverage, unique local usefulness, sitemap inclusion, and contextual links. Do not expand the footprint merely to capture every location phrase.

### ## 4. Search-intent map for priority URLs

| URL                                          | Page type    | Primary intent / concept       | Secondary cluster                | Search Console evidence                | Current action                                         | Links/blog support                                | Risk                                             | Priority/confidence          |
|----------------------------------------------|--------------|--------------------------------|----------------------------------|----------------------------------------|--------------------------------------------------------|---------------------------------------------------|--------------------------------------------------|------------------------------|
| ---                                          | ---          | ---                            | ---                              | ---                                    | ---                                                    | ---                                               | ---                                              | ---                          |
| `/`                                          | Home         | Branded + broad hospice        | Service, county, reviews         | 1,905 imp / 100 clicks / 5.25% / 12.50 | Protect; clarify without disruptive rewrite            | Service, family, county, referral                 | Low                                              | P3 / High                    |
| `/hospice-thousand-oaks-ca`                  | Local        | Hospice care in Thousand Oaks  | Agency, services, home, nurse    | 487 / 2 / 0.41% / 11.35                | related query cluster 632 imp                          | Strengthen relevance/snippet and contextual links | Local article #3; evaluation and Medicare guides | High with #3/#15   P1 / High |
| `/hospice-ventura-and-los-angeles-county-ca` | County       | Hospice coverage in region     | City discovery, referral         | 549 / 2 / 0.36% / 15.62                | Improve above-fold intent and navigation               | Local pages; referral; selected local articles    | Medium                                           | P1 / High                    |

### ## 5. Blog/content inventory

The staged records are dated September 21-October 15, 2026 and have matching published HTML slugs. Recommendations below are analysis only. "Core owner" means the page that should own the main intent; the article should support it.

| #  | Article                                                  | Intent / core owner                             | Overlap risk                      | Recommendation                                                           |
|----|----------------------------------------------------------|-------------------------------------------------|-----------------------------------|--------------------------------------------------------------------------|
| 1  | What Happens During a Hospice Evaluation?                | Pre-referral process / evaluation-referral page | High with 12, 30                  | Keep; make evaluation-only and link adjacent journeys                    |
| 2  | 10 Signs It May Be Time to Consider Hospice              | Early decision / hospice care or eligibility    | Medium with 7-10, 25              | Keep; avoid eligibility promises; link evaluation                        |
| 3  | Hospice at Home in Thousand Oaks                         | Local home hospice / Thousand Oaks page         | High with city and 15             | Refocus with genuine Thousand Oaks logistics; support city page          |
| 4  | Can Hospice Begin After a Hospital Discharge?            | Discharge transition / referral page            | Medium with 1, 30                 | Keep; own discharge coordination                                         |
| 5  | Does Medicare Cover Hospice Care?                        | Coverage / Medicare resource                    | High with Medicare resource       | Expand benefit periods, covered/non-covered items, authoritative sources |
| 6  | Hospice vs Palliative Care                               | Comparison / service explainer                  | High with overview                | Keep; comparison table and evaluation route                              |
| 7  | Dementia and Hospice Eligibility                         | Condition / dementia service                    | Medium with 2                     | Keep; cautious clinical language and evaluation caveat                   |
| 8  | Hospice Care for Advanced Cancer                         | Condition / cancer service                      | Medium with 2                     | Keep; condition-specific support, not generic overview                   |
| 9  | Hospice and Advanced Heart Failure                       | Condition / heart-failure service               | Medium with 2                     | Keep; distinct trajectory/coordination focus                             |
| 10 | Hospice Support for Advanced COPD                        | Condition / COPD service                        | Medium with 2                     | Keep; own breathlessness/caregiver questions                             |
| 11 | The First 48 Hours of Hospice Care                       | Post-admission / first-48 resource              | High with 1, 19-21                | Refocus strictly after election/admission                                |
| 12 | Can a Family Request a Hospice Evaluation?               | Family referral / evaluation page               | Very high with 1, 30              | Merge into one canonical evaluation/referral guide                       |
| 13 | Hospice Care in Simi Valley                              | Local discovery / Simi Valley page              | High with city and 15             | Refocus on local access and unique FAQs                                  |
| 14 | Home Hospice in Camarillo                                | Local home hospice / Camarillo page             | High with generic home hospice    | Refocus on Camarillo-specific logistics                                  |
| 15 | Hospice Care Across the Conejo Valley                    | Regional discovery / Conejo Valley page         | Very high with 3, 16              | Refocus as navigation/coverage guide                                     |
| 16 | Hospice Care in Moorpark                                 | Local discovery / Moorpark page                 | High with 15                      | Refocus on genuinely local access                                        |
| 17 | Hospice in Assisted Living and Skilled Nursing           | Facility referral / facility service            | Medium with 30                    | Keep; add professional/facility pathway                                  |
| 18 | Family Caregiver's Role in Home Hospice                  | Caregiver education / family guide              | High with 19, 21, extra caregiver | Refocus on role/boundaries                                               |
| 19 | How Hospice Manages Comfort Medications                  | Practical medication / home hospice             | Medium with 11, 20                | Keep; add safety and escalation guidance                                 |
| 20 | What Medical Equipment Can Hospice Provide?              | Equipment planning / services                   | Medium with 5, 11                 | Keep; clarify examples, setup, limits                                    |
| 21 | What 24/7 On-Call Hospice Support Means                  | After-hours support / services                  | Medium with 11, 18                | Keep; distinguish urgent hospice support from emergency services         |
| 22 | What Is Hospice Respite Care?                            | Caregiver relief / respite service              | Medium with 18                    | Keep; explain planning and limits carefully                              |
| 23 | How a Hospice Social Worker Supports the Family          | Team role / interdisciplinary service           | Low/medium                        | Keep; own social-work role                                               |
| 24 | Spiritual Care in Hospice                                | Whole-person support / team page                | Medium with wellness extras       | Keep; non-coercive, hospice-specific scope                               |
| 25 | What to Do When a Parent Refuses Hospice                 | Family decision support / evaluation            | Medium with 2, 12                 | Keep; autonomy and listening, not conversion                             |
| 26 | How to Choose a Hospice Provider                         | High-intent comparison / hospice provider       | High with service/local pages     | Expand checklist; avoid "best" claims                                    |
| 27 | Questions to Ask a Doctor About Hospice                  | Decision checklist / evaluation-referral        | High with 1, 12, 25               | Keep; distinct checklist format                                          |
| 28 | Eating and Drinking Changes Near End of Life             | Caregiving/symptom support / comfort service    | Medium                            | Keep; include safety and call-team guidance                              |
| 29 | Grief Support Before and After a Loss                    | Bereavement / bereavement service               | Medium with extras                | Expand anticipatory vs post-loss distinction                             |
| 30 | How Physicians and Facilities Refer a Patient to Hospice | Professional referral / refer page              | Very high with 1, 12              | Merge into canonical referral guide; retain facility detail in 17        |

### Six additional published blog posts

`five-hospice-myths-that-cause-families-to-wait.html` (supports #2; avoid duplicating signs/eligibility), `music-at-the-bedside.html` (supporting whole-person/spiritual care), `sound-baths-ancient-comfort-for-body-and-spirit.html` (keep clearly distinct from clinical hospice claims), `talking-with-children-when-a-loved-one-is-seriously-ill.html` (family communication; adjacent to #25/#29), `the-caregiver-who-needs-care.html` (caregiver support; coordinate with #18/#22), and `the-quiet-work-of-hospice-volunteers.html` (distinct team-role content).

## ## 6. Cannibalization report

1. **Evaluation/referral:** #1, #12, and #30 overlap strongly. Select one canonical guide with family and professional sections; link the others only if retained as narrowly distinct supporting content.
2. **Post-admission journey:** #1, #4, #11, #19, #20, and #21 can coexist only when each owns evaluation, discharge, first 48 hours, medication, equipment, or after-hours support respectively.
3. **Local cluster:** #3, #13–16 and the matching city/region pages must have different jobs. City pages own “hospice in [place]”; articles provide local logistics and family context. Do not make every article a location landing page.
4. **Family/caregiver:** #18, #22, #25, #29 and the caregiver/children extras need distinct stages: caregiver role, respite, refusal conversation, bereavement, and child communication.
5. **Medicare/comparison:** #5 should support the Medicare resource; #26 should own provider-selection criteria. Neither should make unsupported “best,” coverage, or outcome claims.
6. **Clinical guides:** #7–10 should remain condition-specific and avoid repeating generic signs, eligibility, or service introductions.

## ## 7. Recommended internal-link architecture

Use the work-order hierarchy:

`Educational blog/resource → core hospice or clinical page → county/relevant local page → referral/contact pathway`

Recommended implementation rules:

- Every retained article should have one contextual link to its core owner near the first relevant explanation and one appropriate next-step CTA.
- Evaluation/referral articles link to `/hospice-care`, `/family-guide`, `/refer`, and the county hub where geography is genuinely relevant.
- Medicare content links to the Medicare resource, family guide, hospice service page, and referral path; it should not promise coverage without factual support.
- Condition articles link to the service/evaluation path, not every city page.
- Local articles link to exactly one matching city/region owner plus the county hub when useful; avoid location-page link farms.
- The county hub links to supported city pages; city pages link back to the hub and to referral/service pages.
- The blog hub should expose a clear topic taxonomy and only deployed, indexable posts.
- Review `/blog/index.html` duplication and sitemap alignment in a later technical phase; do not change it during this analysis phase.

## ## 8. Page-by-page recommendations

| Page group | Recommendation |

|---|---|

- | Homepage | Protect title, brand architecture, trust sections, and conversion paths. Do not rewrite based on query volume alone. |
- | Thousand Oaks | P1: one consolidated local-commercial intent; improve opening relevance, title/snippet testing, and contextual links. |
- | Ventura/LA County hub | P1: make regional coverage and next steps immediately clear; verify each linked community is supported and useful. |
- | Medicare resource | P1: factual CMS/Medicare review, benefit-period and covered-service clarity, stronger introduction and internal links. |
- | Westlake Village | Protect current visibility; no broad rewrite. |
- | Calabasas/Simi Valley | P2: assess local usefulness, snippet, and contextual links; do not infer query ownership. |
- | Broad hospice/service pages | Protect; make ownership and pathways clear without competing with focused resources. |
- | Resources hub | Protect; improve labeling/routing only after reviewing click-through. |
- | First 48 Hours | P2: own post-admission timeline, not evaluation/referral. |
- | Blog hub | P2: review snippet, taxonomy, deployed URL list, and article-to-owner links. |
- | Referral/provider pages | Protect forms and conversion paths; consolidate referral education rather than creating duplicate guides. |
- | 146 city pages | Audit truthfulness, unique usefulness, thinness, and coverage before any expansion; do not mass-rewrite automatically. |

## ## 9. P1 proposed metadata (recommendation only)

These are proposed options for approval, not implemented copy.

| URL | Proposed title | Proposed H1 | Proposed meta description |

|---|---|---|---|

- | `/hospice-thousand-oaks-ca` | Hospice Care in Thousand Oaks, CA | Eternal Life Hospice | Hospice Care in Thousand Oaks | Learn how hospice care at home supports families in Thousand Oaks, with guidance on services, the care team, and how to request an evaluation. |
- | `/hospice-ventura-and-los-angeles-county-ca` | Hospice Care in Ventura & Los Angeles Counties | Eternal Life Hospice | Hospice Care Across Ventura and Los Angeles Counties | Explore hospice care, family guidance, and referral information for communities served across Ventura and Los Angeles Counties. |
- | `/resources/medicare-hospice-benefit` | Medicare Hospice Benefit: Coverage and Questions | Understanding the Medicare Hospice Benefit | Learn what the Medicare hospice benefit generally covers, how benefit periods work, and which questions to confirm with a qualified

hospice or Medicare resource. |

Metadata must be reviewed against the actual service area and current CMS guidance before implementation. No coverage promise is implied.

#### ## 10. Proposed blog revisions

**\*\*First:\*\*** consolidate #12 and #30 into #1 or a new approved canonical evaluation/referral guide. **\*\*Second:\*\*** refocus local articles #3 and #13-16 around real local logistics and their matching location owner. **\*\*Third:\*\*** expand #5 with authoritative Medicare detail and #26 with a neutral provider-selection checklist. **\*\*Fourth:\*\*** tighten #11 and #18-21 to distinct care-journey stages. **\*\*Fifth:\*\*** retain disease, spiritual, grief, and caregiver articles with careful boundaries and internal links.

Before any rewrite, verify medical language, visible claims, date accuracy, author attribution, and source links. Do not introduce response guarantees, same-day admission promises, outcomes, accreditation/licensing claims, or unsupported insurance claims.

#### ## 11. Pages explicitly not to change in this phase

- Do not change robots.txt, sitemap.xml, canonicals, noindex directives, global Organization schema, founder identity/schema, analytics, tags, consent, forms, hosting, or production configuration.
- Do not publish, delete, merge, or rewrite any Journal article yet.
- Do not mass-rewrite the 146 location pages.
- Do not disrupt the homepage, Westlake Village page, Long Beach page, founder page, careers page, or other small-sample high-performing pages.
- Do not optimize for nursing homes, assisted living, generic caregiving, or other adjacent intents.
- Do not turn Search Console queries into advertising claims such as “best hospice.”
- Do not claim a query belongs to a URL from this workbook alone.

#### ## 12. Proposed implementation sequence

1. Approve this analysis and confirm the actual supported service geography.
2. Obtain query-to-page data or a separately joined export before making URL ownership decisions.
3. Verify production URL inventory, sitemap accuracy, duplicate blog hub behavior, and schema-visible content in a technical-only review.
4. Protect homepage, Westlake Village, branded/founder, careers, and small-sample high-CTR pages.
5. Improve and measure the Medicare resource with factual review.
6. Improve Thousand Oaks local page and its single supporting article; then review the regional county hub.
7. Review Calabasas and Simi Valley pages without creating variant pages.
8. Consolidate/refocus evaluation/referral articles and sharpen post-admission articles.
9. Refocus the five Ventura-area local articles to support their location owners; plan a separate LA County content gap only if supported by service-area evidence.
10. Implement contextual internal links and update metadata only after approval.
11. Re-export Search Console after a meaningful observation period and compare clicks, impressions, CTR, and position by page and query.

**\*\*Stop point:\*\*** This deliverable intentionally stops before implementation, publication, deletion, merging, or technical SEO changes.
