

ETERNAL LIFE HOSPICE · DIGITAL UPDATE

SEO, AI & Site Report + Design System

A complete record of today's improvements to search visibility, structured data, and technical quality — plus the brand design system that governs every surface.

PREPARED FOR
Aleksandra Dubina

DATE
August 13, 2026

TOTAL PAGES LIVE
185

OVERVIEW

What Changed Today

Today's sprint addressed four areas that directly affect how Google, AI search engines, and potential referrers find and evaluate this site: **founder identity and authority**, **navigation consistency across all 185 pages**, **email deliverability and trust signals**, and **automated quality infrastructure** that prevents regressions before they go live.

185

Total public pages

175

Pages with consistent approved header

145

City / service-area pages indexed

4

Automated pre-deploy checks now running

All changes are committed and verified locally. Once the branch is published to Netlify, every improvement in this report becomes live on eternallifehospice.com simultaneously.

Why these changes matter for referrals and organic growth

Search engines and AI systems — Google, ChatGPT, Perplexity, Google AI Overviews — evaluate a site on three axes: *entity authority* (who runs this organization?), *structural coherence* (does every page reinforce the same brand?), and *trustworthiness signals* (email authentication, proper schema, no broken redirects). Every item in this report addresses at least one of those axes directly.

SEO & STRUCTURED DATA

Founder Identity & Google Knowledge Graph

A canonical founder biography page was built and linked site-wide at **/about/aleksandra-dubina**. This is the single authoritative URL Google uses to resolve your identity when any user searches for the organization's leadership — critical for hospice providers because referrers often research leadership before making a referral call.

ELEMENT	BEFORE	AFTER (TODAY)
Canonical biography URL	None	/about/aleksandra-dubina
Person schema (structured data)	Homepage only, no URL	Updated to link to canonical page
Credentials displayed	Mixed / inconsistent	Founder & CEO · Certified Hospice Administrator
Personal phone on public pages	Visible	Removed from all public HTML
Logo paths (founder page)	Relative (broke off /about/)	Root-relative — resolves on any path

How Google and AI use this

When Google indexes a Person structured data record linked to a canonical biography page, it begins building a *Knowledge Graph entity* for that person. Searches for "Aleksandra Dubina hospice" or "Eternal Life Hospice founder" become more likely to surface a Knowledge Panel. AI systems (ChatGPT web search, Perplexity, Google AI Overviews) source structured data and canonical pages to accurately answer "Who runs Eternal Life Hospice?" — a common question from families researching providers.

Impact timeline: Google typically re-crawls an updated page within 1–7 days. Knowledge Graph entity recognition can take 2–6 weeks of sustained indexing. The page

is built correctly today; the benefit compounds over time.

TECHNICAL SEO

Navigation Consistency & Internal Link Equity

Every one of the site's 175 public pages now carries an identical, verified navigation header. A global nav appearing on all 175 pages passes *link equity* from every page to every other page on the site. When four pages had broken or legacy headers, they were partially disconnected from the site's internal link graph. That is now corrected.

PAGE	ISSUE CORRECTED	STATUS
Hospice Care /hospice-care	CTA was phone number, not "Request Care" link	FIXED
Services /services	CTA was phone number, not "Request Care" link	FIXED
Privacy Policy /privacy-policy	Legacy header — no search, no CTA, stale mobile menu	FIXED
Terms of Service /terms	Legacy header — no search, no CTA, stale mobile menu	FIXED
All 171 remaining pages	Verified identical — no issues found	VERIFIED

The six-item navigation

The approved nav — **Hospice Care · Services · Resources · Locations · For Professionals · About** — mirrors the site's content hierarchy. Appearing on all 175 pages, it tells Google the architecture of the entire site, not just the homepage.

Automated verification

A parity check script now scans all 199 HTML files before every deploy, verifying logo, nav, CTA, search, and hamburger on each standard page. If any page fails, the deploy stops. This defect cannot silently reappear.

EMAIL DELIVERABILITY & DOMAIN TRUST

Email Authentication & Sender Reputation

AUTHENTICATION LAYER	WHAT IT DOES	STATUS
DKIM	Cryptographically signs every outbound email so recipient mail servers verify it genuinely came from ELH's domain	ACTIVE
DMARC	Tells Gmail, Outlook, and Apple Mail to quarantine emails that claim to be from ELH but fail authentication	ACTIVE · QUARANTINE
Old domain forwarding	Emails to old eternalhospice.com addresses route to correct ELH inboxes	DNS SETUP PENDING

Why this affects referrals directly

Physician liaisons, discharge planners, and social workers often send an email to test responsiveness. If that email — or ELH's reply — ends up in a spam folder, the referral goes to whoever replied first. DKIM and DMARC together prevent that scenario and protect ELH's sender reputation long-term.

Team action required: Forward the old domain (*eternalhospice.com*) at the DNS level so emails sent to legacy team addresses still arrive. This is a GoDaddy DNS change — no website changes needed.

Automated quality checks — nothing broken ships

Four checks now run inside Netlify's build pipeline before every deployment. If any check fails, the deploy is blocked.

CHECK	WHAT IT CATCHES
Header parity	Any of the 175 standard pages missing the approved logo, nav, CTA, search, or hamburger
City script integrity	JavaScript regressions on the 145 city / service-area pages
Redirect validation	Broken URLs, self-referencing redirect loops, or rules pointing to missing pages
Coverage lookup	City search accuracy across all 145 service areas

SITE ARCHITECTURE

Current Site — 185 Pages

SECTION	PAGES	PRIMARY SEO PURPOSE
City / service-area pages	145	"Hospice in [city]" and "near me" searches — long-tail organic capture
Core content pages	~20	Homepage, Hospice Care, Services, Refer, About, Careers, etc.
Resource guides	9	Informational queries (Comfort Therapies, Medicare Benefit, Volunteer, etc.)
Blog — The Eternal Journal	6	Topical authority, long-tail search, family trust building
Care Brief articles	2	Depth content for professional referrers
About / Founder	1	Entity authority — Knowledge Graph candidacy

COMING NEXT — SEO & VISIBILITY

- ✓ Neighborhood keyword expansion on Ventura County city pages
- ✓ Site search — surface neighborhood queries on inexact match
- ✓ Breadcrumb / active-section indicators on city sub-pages
- ✓ Sound Bath page — distinct hero image for richer snippets

COMING NEXT — CONVERSION

- ✓ Footer Locations column — show visitor's county first
- ✓ Footer auto-sync when nav changes
- ✓ Chat widget — prevent silent hang on AI model failure
- ✓ Old-domain forwarding — confirm mail arrives after DNS

PART TWO · BRAND IDENTITY

Eternal Life Hospice Design System

The visual and verbal standards that govern every surface — digital, print, social, and internal communications. All vendors, designers, and team members work from this system.

COLOR SYSTEM

Brand Palette

Five colors govern every surface. No other colors are introduced without written approval. The deep plum and cream are the primary pairing; gold is the accent and never the background field.

				
Deep Plum #3C1C3B Primary backgrounds · Print card fronts · Deep contrast surfaces	Plum #5B2E59 Secondary panels · Table headers · Hover states · Section dividers	Gold #C9B07E Accents · Rule lines · Eyebrows · CTA borders · Print crop marks	Cream #F5F0EB Page backgrounds · Card backs · Type on dark · Social graphic fill	Stone #7A7068 Body text support · Captions · Metadata · Subdued labels

Print CMYK note: Deep Plum (#3C1C3B) is CMYK-stable and round-trips correctly through Ghostscript. Gold (#C9B07E) prints as a warm metallic-adjacent tone — do not attempt to substitute Pantone without approval. All print files use embedded ICC profiles.

TYPOGRAPHY SYSTEM

Two-Typeface System

Every ELH surface uses exactly two typefaces. No substitutions. No system fonts on branded outputs.

FRAUNCES — EDITORIAL SERIF

VARIABLE · OPTICAL SIZE AXIS · GOOGLE FONTS

Care That Honors Life

The First 72 Hours

Use for:

Page headlines · Hero text · Pull quotes · Emotional anchors · Rack card wordmarks

Weights: 300 Light · 400 Regular · 600 SemiBold — italic available at all weights

Print wordmark: Weight 455 · opsz 58 (display cut) — never use defaults at 30pt+

JOST — CLEAN GEOMETRIC SANS

STATIC · GOOGLE FONTS · SELF-HOSTED ON SITE (JOSTELH SUBSET)

SAME-DAY ADMISSION · 24/7 NURSE LINE

Families deserve dignity, clarity, comfort, and protection during one of life's most vulnerable moments.

Use for: Navigation · Body copy · Labels · CTAs · Data tables · All-caps eyebrows

Weights: 300 Light (body) · 400 Regular · 500 Medium · 600 SemiBold · 700 Bold

Never use: Arial, Helvetica, Times New Roman, or any system font on brand collateral

IDENTITY

Logo Lockup Rules

The ELH logo is a three-part lockup: the infinity-mark symbol, the wordmark "Eternal" in Fraunces, and the descriptor "LIFE HOSPICE" in Jost. All three travel together. No element is used in isolation except the symbol as a standalone icon in confined spaces (app icons, favicon, QR badge center).

ELEMENT	SPECIFICATION
Symbol (∞ mark)	Width = 85% of "Eternal" wordmark width. Source: <i>eternal-life-hospice-infinity-cream-hires.png</i> (1111×490 px, ~840 dpi at display size). Never stretch or recolor.
"Eternal" wordmark	Fraunces, weight 455, opsz 58, 30pt on rack card. Width is the reference unit — all other elements are proportional to it.
"LIFE HOSPICE" descriptor	Jost 600, all-caps, letterspaced, justified across 73% of "Eternal" width, centered under "Eternal." Never wider than 73%.
Clear space	Minimum: half the cap-height of the wordmark on all four sides. No other element enters this zone.
Minimum size (print)	1.25 inches wide for the full lockup. Below this, use the symbol alone.

✓ **APPROVED USES**

Cream lockup on deep plum background (primary — all print front covers)

Plum lockup on cream or white background (digital, web headers)

Gradient / gold mark on light backgrounds (secondary digital use)

Full three-part lockup on all collateral covers, email headers, rack cards

Symbol-only in favicon, app icon, QR badge center, social avatar

✗ **NEVER DO THIS**

Gradient / colored mark on dark or plum background

Cream mark on a light, low-contrast background

"LIFE HOSPICE" wider than 73% of "Eternal" — breaks the locked proportion

Stretching, skewing, rotating, or adding drop shadows

Placing the logo in the clear-space zone of itself or another element

Using rasterized text instead of
vector/font-rendered wordmark

Source of truth: *brand-assets/Medical/eternal-life-hospice-logo-cream-gold-subtitle.png*
is the master. The cream variant (logo-eternal-trans.png) is for print production. Never
regenerate from memory — always start from these files.

VISUAL CONTENT SYSTEM

The Five

A proprietary set of five images and names that form the visual spine of all editorial content — Care Briefs, social Reels, story frames, website section dividers, and print publication headers. Every image carries a name that was chosen deliberately; the naming pattern is locked.

				
<i>The Stone</i> Raw amethyst geode Clarity · Origin · The brand's namesake	<i>The Energy</i> Bronze singing bowl Sound healing · Integrative care	<i>The Word</i> Gold-nib pen on handwritten script Narrative · The founder's voice	<i>The Touch</i> Macro amber iris Presence · Human connection · Witness	<i>Stillness.</i> Single candle in darkness Peace · The final state · No "The"

Critical naming rule: The first four elements carry "The" — they are acts, objects, and forces. *Stillness* has no "The" — it is a state, not a thing. Never add "The" to Stillness. This distinction is intentional and permanent.

Care Brief Mosaic Schedule

The Five are revealed progressively across nine months of the Care Brief, one article every other month. The mosaic grows — never resets.

MONTH 1 The Stone alone	MONTH 3 Stone + Energy gold seam divides	MONTH 5 Three images Stone tall-left, Energy + Word stacked right	MONTH 7 2×2 grid — all four gold crosshair + diamond	MONTH 9 2×2 + Stillness as wide bottom strip
-----------------------------------	---	--	---	---

Extended uses

Caption openers and Reel end-card titles · Care Brief section headers · Instagram Story frames · Website section dividers · Print publication chapter openers. Each element anchors the content theme of the piece it heads.

BRAND VOICE

How Eternal Life Hospice Speaks

The ELH voice is **calm, refined, clinically credible, and warm without sentimentality**. It feels premium and human — luxury felt, never claimed. Peers use scale-and-protocol language. Eternal uses presence-and-attention language. That contrast is the brand.

VOICE DIMENSION	DIRECTION
Pace	Slower than feels natural. Let sentences breathe. One idea per sentence.
Tone	Warm, measured, authoritative. Not clinical. Not corporate. Never preachy.
Emotional register	Calm grief is welcome. Sentimentality is not. This is sacred work, not sad work.
Frame	Always institutional: "At Eternal Life Hospice, we..." — never the personal "I"
Filler	None. No "um," "so," "you know," or "amazing." Edit everything that is not doing work.

WRITE THIS

"At Eternal Life Hospice, we..."

"Here is what our team does for families in this moment..."

"Families who work with us tell us..."

"Care That Honors Life"

"We Are Here. Always."

"Compliance is patient protection."

"Same-day admission · 24/7 nurse line"

NEVER WRITE THIS

"I am so proud of our team..." (personal, not institutional)

"Our sound bath will heal you" (efficacy claim — prohibited)

"Medicare covers our sound bath sessions" (factually false)

"Fighting cancer" / "battling illness" (conflict framing — wrong register)

"Amazing!" / "We're so excited!" (hollow enthusiasm)

Any competitor's name in content (never name competitors)

KEY PHRASE BANK

These phrases are approved, consistent, and can be used across all channels without additional review:

Care That Honors Life

We Are Here. Always.

The First 72 Hours

Same-Day Admission

Answered 24/7 by a Hospice Nurse

Compliance is Patient Protection

Founder-Led · Independent · Integrative

SOCIAL MEDIA & CONTENT PRODUCTION

The production format: voice + still image overlays

The founder (or a voiceover artist) records narration. The narration is layered over still images, The Five visuals, and brand graphics. **No talking head. No founder face on screen.** The result feels like premium documentary or editorial — not a personal vlog. This protects brand equity transferability for acquisition.

Who Is On Camera

Safe (on camera):

Registered Nurse · Social Worker · Chaplain · Hospice Aide · Music Therapist · End-of-Life Doula · Volunteer

Founder: Voiceover only. The team is the face of the care. The founder is the voice of the standard.

Platform Mix

Instagram: Reels (voice-over stills) · Feed carousels · Story frames using The Five

LinkedIn: Long-form posts · Care Brief distributions · Professional referral content

Google Business: Weekly photo updates · 8-week content library on rotation

The Three Pillars

Clinical Confidence — what the team can do

Guided Presence — how the team shows up for families

Whole-Person Comfort — the integrative & human dimension

Compliance-Led Care — trust and protection

ETERNAL LIFE HOSPICE
